

## Jog shuttle Switch 5 direction push switch

RDS-Y0003

### Feature

Combination of (rotational pulse switch) + (four direction + center push switch.)

### Application

- Joystick application
- Game machine

### Specification

|                             |   |
|-----------------------------|---|
| Operating Temperature Range | -10 to 60                                     |
| Rating                      | 5V DC 10 mA                                   |
| Output voltage              | 0.5V ~ 4.5V                                   |
| Insulation Resistance       | 10M min. at 100V DC                           |
| Rotational torque           | 6.8+/-4.9mN.m                                 |
| Dimensions                  | 30.6 x 9.5 mm                                 |
| Outer shaft                 | Pulse switch (2 bit 360 ° endless. 30 ° step) |
| Inner shaft                 | 5-direction push switch                       |
